High interest in the VicInAqua pilot site as a training and knowledge-building platform

Study visits indicate the demonstration potential of our pilot for good practices in sustainable water management and fish farming. The site can be used for trainings and capacity-building measures, but also to raise awareness among the local population and stakeholders.

Review Innovate 4 Water in Kisumu, Kenya

The VicInAqua consortium attended Innovate 4 Water in Kisumu, a leading event connecting likeminded people and organizations to share ideas and innovations addressing some of the greatest challenges in the WASH sector. This year's main topic was "Focusing on innovative community-led approaches, entrepreneurship and financing possibilities for water and sanitation in Kenya".
