

Newsletter 05/2019

Welcome to our *fifth and final newsletter* with insights into our project progresses and past events. Hope you will enjoy it; we stay at your disposal if you have any questions!

On 31st of May, the VicInAqua project is coming to a close.

We take a look back and into the future:

'I am very happy that we can finally complete a very successful VicInAqua research project. In general, it was not an easy task to carry out such a challenging project, as it was not just about managing technical issues but also fostering mutual cultural exchange in order to bridge the gap between the European and African societies.' Coordinator Prof. Jan Hoinkis (HSKA)

Thank you to all attendees at our second webinar— Turning water and energy challenges into opportunities! Didn't have time to take part?

The presentation given during the VicInAqua webinar is now available for download. And best of all: it's for free! All you have to do is register for the VicInAqua Forum and you will gain access to a lot of further useful and informative documents about solutions for water, monitoring, aquaculture and renewable energy.

Registration: <http://www.vicinaqua.eu/forum/>

Already registered? The webinar presentation is available [here](#).

VicInAqua at the 19th Annual African Utility Week in Cape Town, South Africa

Partner Steinbeis 2i visited this major event for the power, energy and water sectors in Africa to introduce the VicInAqua concept, network and explore further possibilities for cooperation.
